

Hello my name is Edith. I'm writing to let you know you are not alone. I am always going to be your friend . Let me share this story with you. When I was young and my children were about 7 + 10 years old I would take them for a walk to a close by Assistant living home. So on our way there we had talked to home ~~an~~ owners who all gave ~~us~~ ^{us} permission to pick one flower from their yards. So by the time we reached the Assistant living home we would have a large bouquet of flowers. Each time we went there to visit we would give a different bouquet to a different resident. Well that made them SMILE 

2

but what made them smile even more was visiting with my children. When we were allowed to we would take them for a walk by pushing them in a ~~cart~~ wheelchair. This was very exciting for them. So today looking back I thought of you there during this awful virus and your lock down. Knowing how lonely it must be. So I really wanted to let you know you're never alone, because I am always going to be here for you. Last I'd like you to tell me in a short note if I could get you anything you would really love to have during this trying time, and I'll see what I can do. Someone will come help you send me your note.

~ living Well ~

We all remember,

When we were young
It took no effort
to do something fun

Then after all
the days pass by

It's hard getting up
but we must try
don't let this get ~~the~~

the best of you

Be positive

IN All you do

Smile every time

You get the chance

And when you hear music

get up and dance

God bless you, and stay strong!
